All ingredients of SASA polyester polymers, including the monomers, which are not exempt from REACH, have already been registered by Only Representative of SASA.

For standard SASA polyethylene terephthalate polymer, the registered monomers are dimethyl terephthalate or terephthalic acid and ethylene glycol. For other specific SASA polyester polymers, some additional ingredients may require registration.

For standard SASA polybutylene terephthalate polymer, the registered monomers are dimethyl terephthalate and butanediol. For other specific SASA polyester polymers, some additional ingredients may require registration.

SASA has completed the registration process for the monomer, dimethyl terephthalate, which is produced in house. SASA supplied all other necessary ingredients, including the other monomers, terephthalic acid, ethylene glycol and butanediol, as registered from the suppliers.

Therefore, there is and will be no restriction for import of SASA polyester polymer chips products into the EU.
