
Subject: Declaration of Compliance with Proposition 65

Issue Date: 21.09.2018
Revision Date: 25.01.2024
Revision No: 13
Pages: 1 of 1
Valid until replaced

STATEMENT

We hereby confirm that Sasa polymer cips products do not contain intentionally added chemicals mentioned on the California Proposition 65 list (recent issue dated Dec 29th, 2023.), except Antimony trioxide, CAS-No.1309-64-4.

Polycondensation catalysis using antimony-based compounds represents a general technology for polyester production for more than 50 years. The substance is incorporated in the polymer matrix in catalytic amounts and the antimony amount used for the production of Sasa PET BG resin is below migration limits. Extractable amount of antimony is below 30 ppm.

We are also glad to give you the information that our products are ecologically tested and certified by our Oeko Tex Standard 100 certificate. Our products fulfil the most restricted category's limitations (Class 1 for babies).

In case of further questions, please do not hesitate to contact us.

Yours sincerely,

Gamze ÇELİK
